**Subject:** Microsoft settlement

Dear Sirs,

Given the length of time and considerable expense to the taxpayers of the country suggest that the time is ripe to conclude the matter against Microsoft and allow them to resume the levels of innovation that lead them to become the dominant player in the software business.

Even though I don't believe that Microsoft was guilty of anything other than providing the best solution to consumer's needs this settlement will get business back to business.

Sincerely,

Ken Weiland
